

GOKUL SRINIVASAN PRABU

EDUCATION

- | | |
|---|--------------------|
| • Bachelor of Technology in Artificial Intelligence and Data Science | 2023 – 2027 |
| Sri Krishna College of Engineering and Technology , Coimbatore | CGPA : 8.23 |

PROJECTS

PlantOheart AI

A mobile app for real-time plant identification and disease detection using AI-powered analysis.

- Technologies used : Flutter, Dart, Firebase (Firestore, Auth, Storage), Plant.id API, Gemini API.
- Integrated real-time plant recognition with 90%+ accuracy using API and offline ML models.
- Designed camera-based UI with community feature and AI based assist.

Paw Protocol

A mobile app for real-time dog breed identification using AI-powered image recognition.

- Technologies used : ReactJS, TypeScript, TensorFlow.js, Framer Motion.
- Implemented veterinarian portal and community interactions for shared pet care insights.
- Enabled instant breed classification with ML inference and user onboarding features.

The Gridtronic dashboard

A full-stack analytics dashboard for real-time energy demand forecasting as dashboard.

- Technologies used : Streamlit, FastAPI, LightGBM, Pandas, Plotly, Python.
- Built an interactive Streamlit dashboard displaying live forecasts, API status, and performance metrics.
- Enabled instant breed classification with ML inference and user onboarding features.

WORK EXPERIENCE

- | | |
|---|-----------------------|
| • Hacker-Rank
(Software Engineer Intern) | Oct – Nov 2024 |
|---|-----------------------|

- Technologies used: Python, Data Structures, Algorithms.
- Gained experience writing efficient and testable code under timed challenges.
- Strengthened software engineering fundamentals by solving industry-oriented coding challenges.

- | | |
|---|---------------------------|
| • Infosys
(Artificial Intelligence Intern) | Oct 2025 – Present |
|---|---------------------------|

- Technologies used: ReactJS, Firebase, SQL, Python, Machine Learning.
- Built and trained ML models, integrating inference results into the backend API workflows.
- Implemented user interfaces using ReactJS to support both mobile/desktop views and connected them to Firebase for authentication and data storage.

ADDITIONAL INFORMATION

- **Languages:** C/C++, Java, Python, React, HTML+CSS, Swift.
- **Libraries & Frameworks:** Pandas, NumPy, scikit-learn; LightGBM, TensorFlow (TF Lite / TF.js), OpenCV, YOLOv8, ReactJS, Flask, FastAPI, Streamlit.
- **Tools:** VS Code, Git, GitHub
- **Cloud/Databases:** AWS, Firebase, MySQL
- **Coursework:** DSA, OS, OOP, DBMS, SE
- **Interests:** Web Development, Game Development (Unity 6)
- **Core Competencies:** Problem-Solving, Self-Learning, Presentation, Adaptability
